

To Whom It May Concern,

11th November 2025,

Dear Sir / Madam,

I am writing to express my interest in the **Full-stack Software Engineer** role. As a full-stack software engineer with hands-on experience in **React, Spring Boot, and Django**, I bring a strong blend of front-end and back-end expertise, along with proven skills in system integration and cloud-based deployment.

Over the past 4 years, I have worked on building and maintaining **microservice-based systems** that handle processes such as KYC data processing, credit scoring, and integrations with **core banking systems (CBS)** and **payment gateways**. My experience with **Docker containerization, Bitbucket Pipelines, and Kubernetes on GCP** has strengthened my capability in automating deployments and maintaining scalable, reliable applications.

I take pride in delivering high-quality, tested software, demonstrated by my use of **JUnit for unit testing** and leading **UATs and pilot rollouts**, where I gather user feedback and resolve issues in collaboration with client teams. My ability to work **remotely and in hybrid teams**, utilizing tools like Microsoft Teams, ensures consistent communication and the timely delivery of milestones.

My mix of technical depth, practical experience, and commitment to collaborative problem-solving would make me a strong addition to your team. I would welcome the opportunity to contribute to your projects and further discuss how my background aligns with your needs.

Yours sincerely,

Ciira Kibebe
